

StoreEase

Designed as a 15,000 SF phase of a larger 40,000 SF self-storage facility, this project showcases a modern, customer-centric solution for StoreEase in Loganville, GA. We utilized high-quality components to create a 24-hour facility that prioritizes security and convenience through advanced self check-in, controlled access, and integrated surveillance. The design features both climate-controlled interior units and exterior units with roll-up doors, providing flexible storage options for a wide range of customer needs. This facility not only sets a new standard in self-storage functionality and accessibility but embodies our mission of elevating industry standards with every project.
