

Construction Group

Solid Rock Church

This 21,000-square-foot worship facility was meticulously designed and built by SCB Construction Group's in-house team. A harmonious blend of insulated metal panels, stucco, and stone showcases both functionality and visual appeal. Despite multiple client-driven changes, our commitment to safety remained paramount, resulting in zero incidents on-site. The project also stayed on schedule and on budget, demonstrating our agility and thorough planning. Every detail—from the striking exterior finishes to the thoughtfully arranged interiors—underscores our dedication to excellence in construction and design. This inviting space is set to serve as a vibrant center for its congregation for years to come.
